

the
PUBLIC SPACE RESEARCH GROUP
presents

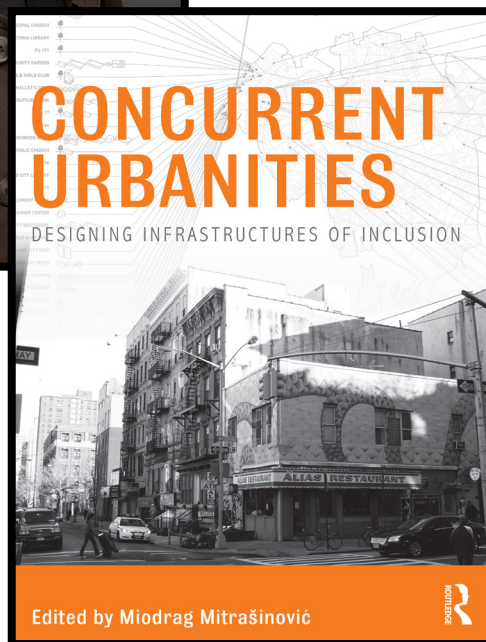

Designing Infrastructures of Inclusion

June 26, 2020
via ZOOM 
12:00-1:30p EST

Miodrag Mitrasinovic is an architect, urbanist, author, and Professor of Urbanism and Architecture at Parsons School of Design, and Co-Chair of Parsons Graduate Urban Programs.

Miodrag's scholarly work focuses on the role design plays as an agent of social and political change, and as a catalyst for critical urban transformations. His research argues for the centrality of designing in the conceptualization, production, and representation of democratic and participatory urban space. Miodrag's work also focuses on the generative capacity and infrastructural dimensions of public space, specifically at the intersections of urban and public design, socio-spatial justice, and public policy.

He is currently completing manuscripts for "The Public Space Reader" (co-editor, Routledge 2020) and "Public Space in a Chinese Megaregion: Contemporary Urban Practices and Design Strategies of the Greater Bay Area" (co-editor, Routledge 2021). He is the co-editor of "Cooperative Cities" (Journal of Design Strategies Vol. 8, 2018); editor of "Concurrent Urbanities: Designing Infrastructures of Inclusion" (Routledge 2016); co-editor of "Travel, Space, Architecture" (Routledge 2009); and author of "Total Landscape, Theme Parks, Public Space" (Routledge 2006).
